

Dear TYiS,

After leaving TYiS, I asked my son how he liked his new school, he replied that it is awesome, but he only wishes he could have his teachers from TYiS. He said that the principal from TYiS "gets him" and understands what is going on in his head. My daughter commented that she misses the family feeling at TYiS and the whole school assemblies and special events that broke up the regular school days. The teachers at my children's new school have commented that they are far ahead academically even though they were considered too young for the grades they have entered.

Thank you TYiS for giving my children a strong base, academically and socially. You provided them with a loving and supportive environment and ensured they developed strong study skills, which gave them the confidence to challenge themselves in this adventure we have embarked on.

TYiS Parent - 2011
