

“The things I learned in TYIS help me in my everyday life”

I am one of the students who graduated from Tokyo YMCA International School last year. I've made tons of great memories and enjoyed my elementary school life in this school.

When I first came to TYIS when I was Grade 1, I couldn't speak any English, and was surprised by the children of my age speaking native English. I was really worried if I would be able to fit in, but somehow I enjoyed my studying in TYIS. By the time I was grade 2, I got out of ESL and took classes like the other students. I have learned new things in this school and it was really sad to graduate. It felt really long, but also short this 6 years in TYIS.

I had great experiences in TYIS that can't be experienced in other schools. For example, the business clubs. Last year, my friends and I started a babysitting business which was really hard, but we learned a lot of stuff by experiencing this. And other experiences like Fall/Ski Camps were really fun too.

And now, I am a middle school student in Tokyo Gakugei University International Secondary School. I am having fun in this school and the things I learned in TYIS help me in my everyday life.

I would like to thank all the teachers and students who helped me learn English and also let me have an enjoyable school life. If I didn't have these people's help I wouldn't be able to love English. So, I will never forget the days I was in TYIS. Thank you TYIS!!!
